**Re: City of Lethbridge Chinook 181S DER Solar**

City of Lethbridge Electric Utility is working with NU-E Corp on the interconnection of an 8.75MW solar facility located at LSD 1/4-10-9-22 W4M to Chinook 181S substation at 13.8kV distribution system.

The project has been submitted to AESO on November 8, 2021 and is classified as a Behind the Fence project. The plan is to file a Power Plant application to AUC in October 2022. Once the plant gets approved, DFO will start construction in the last quarter of 2022. And Generator construction will target to begin in March 2023.

Please contact me if you require additional information or clarification.

Best regards,
